

XM Radio is the best thing thats happened to radio ever. I don't have to listen to the awful monotony of FM or the dull AM choices. I can hear the music I want to hear or the talk I want to hear anytime. XM can offer special stuff THAT I PAY FOR. It's like cable TV: you get what you PAY for. The NAB is shaking because finally we have some real choice and variety instead of the "radiogarbage " called FM which is really air pollution. With the exception of some talk stuff AM is hopelessly OLD and OUTDATED. XM is new and wonderful. Let's let XM Radio THRIVE !!!
